

# MOHAMMED ARSHAD

## Full-Stack Software Developer ( Open to relocation )

Dhaka, Bangladesh

[Email](#) | [Phone](#) | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

### Professional Summary

---

Full-Stack Software Developer with over 4 years of experience specializing in the TypeScript ecosystem, including Angular, React/Next.js and Node.js (Express / NestJS). Proven track record of delivering production-grade apps and leading large-scale framework migrations that improved performance by 20% and reduced operational costs by 30%. Currently driving architectural decisions and mentoring junior developers at Roar Media Studio, with a strong focus on scalable microservices and modern UI/UX. Experienced in optimizing cloud infrastructure across AWS and GCP, implementing CI/CD pipelines and ensuring 95% on-time delivery within international, distributed teams.

### Technical Skills

---

Frontend : JavaScript, TypeScript, Angular, React, Next, RESTful API, GraphQL, TailwindCSS, Redux, Zustand

Backend & DB : Node.js, Express.js, NestJS, Python, PostgreSQL, MongoDB, Prisma ORM, Microservices, DB Design

DevOps & Cloud : Docker, AWS, CI/CD, GitHub Actions, IaC, Linux, VPS Management, Nginx, Kubernetes, Terraform

Quality & Performance : Jest, Playwright, Scalability, Strategic Planning, Debugging, Automated Testing, Web vitals

Soft Skills : Agile, Scrum, Leadership, Mentorship, System Design, Problem Solving, Adaptability, Calm

### Work Experience

---

Software Developer (Full-Stack)

November 2025 - Present

Roar Media Studio | Vantaa, Finland (Remote, Freelance)

- Designing feature-rich frontend and implementing scalable backend for production-grade MVP using Next.js and NestJS with ownership over core architectural decisions.
- Also built a company portfolio with focus on modern UI/UX, performance optimization & brand promotion.
- Mentoring junior & intern developers through code reviews, architectural workshops and pair programming.

Software Developer (Full-Stack)

January 2024 - November 2025

Tutors Finland Oy | Espoo, Finland (Remote)

- Collaborated daily with a remote international team, ensuring seamless coordination across global time zones.
- Led end-to-end migration of a production Ed-tech application from Angular 10 to 16, resolving 350+ critical issues, eliminating security vulnerabilities and achieving 20% performance improvement.
- Re-architected legacy Express.js REST APIs to improve response times by 30% through database query optimization and caching layer.
- Facilitated daily stand-ups and sprint planning for 6-8 person engineering team across two products (Angular/Express.js & Next.js), ensuring on-time feature delivery.
- Drove two major projects to successful completion: Angular/Express "Chef Koochooloo" platform and Next.js "Creatlon" application, consistently meeting all development milestones.
- Engineered automated migration script transferring high-volume media assets from Google Cloud Storage to Amazon S3, reducing storage costs and enhancing security.

- Architected and implemented modular frontend components for RESTful microservices, optimizing data fetching logic to achieve a 15% boost in Lighthouse performance scores across high-traffic enterprise applications.
- Enhanced user experience across 3 major projects by implementing 30+ features, reducing bounce rate by 10% and increasing user engagement metrics.
- Integrated modern frontend technologies including Next.js, Axios and TanStack Query to deliver complex features independently and accelerate development timelines.
- Collaborated cross-functionally with client, design and backend teams to ensure clear requirement alignment, achieving 95% on-time delivery across 3 major projects.

## Projects

---

### Chef Koochooloo -

Rescued & modernized this Ed-Tech platform that previous development teams could not progress. Led team of 6-8 developers through sprint planning, client meetings and critical delivery milestones. Migrated from Angular 10 to 16, resolving 350+ critical issues blocking previous teams. Architected CI/CD pipelines, migrated GCP assets to AWS infrastructure and delivered a production-ready release that revived investor confidence and secured new funding, transforming a stalled project into a successful platform.

Tech Stack: Angular, Express.js, MySQL, AWS. [Live site](#)

### Supplers -

B2B platform connecting wholesalers & retailers in the furniture and interior design industry. Contributed as a team member, implementing key features including authentication, product/service CRUD operations, file handling, search/filter/sort, Stripe payment, real-time chat & admin dashboard. Resolved high-priority production issues and architectural inconsistencies. Collaborated with leadership to suggest improvements and optimize user workflows.

Tech Stack: Next.js, Django, Vercel, AWS. [Live site](#)

### LoreBot Ai -

A modern lore characters chatbot application using Next, NestJS & Google Gemini API. Designed a scalable backend with PostgreSQL/TypeORM, secure environment-based configuration, real-time conversation handling, push notifications and migration-safe database management. Developed extensible APIs for user management, authentication / authorization, character profiles and conversation logic. Deployed the system to Vercel.

Tech Stack: Next.js , Nest.js, Vercel. [GitHub Repo](#) [Live site](#)

## Education & Professional Development

---

### LL.B. (Hons.) Southeast University (2020)

Self-taught Software Developer (2020-2022) via FreeCodeCamp, YouTube, production projects 4+ years professional IT experience in TypeScript/JavaScript ecosystem from 2022.

## Language Proficiency

---

- |           |                        |
|-----------|------------------------|
| ● Bangla  | Fluent (C1/C2)         |
| ● English | Fluent (C1/C2)         |
| ● German  | A2 (Actively learning) |
