LinkedIn <https://www.linkedin.com/in/mohammed-arshad-67920b213/>
Date of Birth 23.10.1996

Professional Summary

Full-stack Software Engineer (TypeScript, Angular, React, NestJS) with over 4 years of experience in European remote teams. Specialized in migrations, team leadership, and scalable production applications. Proven success in modernizing critical legacy systems and improving performance by up to 20 percent. Currently focused on the German market with relocation readiness.

Professional Experience

- 11/2025 - heute **Lead Software Developer**, *Roar Media Studio*, Vantaa, Finland (Freelance)
- Designed and implemented scalable backend services using NestJS, including API architecture, authentication and database integration for a production-grade MVP.
 - Led full-stack development (Next.js + NestJS) from concept to production within 12 weeks, ensuring scalability and performance from day one.
 - Improved Core Web Vitals and reduced load times by 30 percent through frontend optimization and efficient data handling.
 - Managed CI/CD pipelines, infrastructure monitoring, and deployments, maintaining 99.3% system uptime.
 - Mentored junior developers through code reviews, architecture discussions, and pair programming.
- 01/2024 - 11/2025 **Full-Stack Software Engineer**, *Tutors Finland Oy*, Espoo, Finland (Remote)
- Led migration of a production EdTech platform from Angular 10 to 16, resolving 350+ critical issues and improving performance by 20%.
 - Re-architected legacy REST APIs, improving response time by 30% through query optimization and caching strategies.
 - Collaborated in a distributed team of 6–8 developers, leading sprint planning and ensuring on-time delivery of key features.
 - Built an automated data migration pipeline from Google Cloud Storage to AWS S3, reducing storage costs by 35%.
- 01/2023 - 12/2023 **Software Engineer (Frontend)**, *Repliq Limited*, Dhaka, Bangladesch (Hybrid)
- Built modular frontend components for microservice-based systems, improving Lighthouse performance scores by 15%.
 - Delivered 40+ features across multiple enterprise applications, increasing user engagement and reducing bounce rate by 10
 - Collaborated cross-functionally with product, design, and backend teams to deliver features with a 99% on-time delivery rate.
 - Coordinated requirement alignment between clients, design and backend teams, achieving a 99% on-time delivery rate across three major projects.

Technical Skills

Frontend & UX	JavaScript, TypeScript, React, Angular, Next, RESTful API, TailwindCSS, Redux, MobX, Zustand, Clerk
Backend & Database	Node.js, Express.js, NestJS, REST API, Authentication, PostgreSQL, MongoDB, Prisma ORM, TypeORM, Microservices, Database Modeling, Database Migration
DevOps & Cloud	Docker, Kubernetes, AWS, CI/CD, GitHub Actions, IaC, Linux, VPS Management, Nginx, Terraform
Quality & Performance	Jest, Playwright, scalability, Strategic Planning, Debugging, Automated Testing, Web-Performance-Metrics
AI & Automation	Cursor, Claude, ChatGPT, GitHub Copilot, Gemini & other third party AI API integration, AI-assisted development workflows

Project Experience

Chef Koochooloo	Took over a stalled platform and led a team of 6–8 developers to deliver a production-ready system. Migrated Angular 10 → 16, resolving 350+ blocking issues. Designed CI/CD pipelines and migrated infrastructure from GCP to AWS.
Supplers	Built core platform features including authentication, real-time chat, payments (Stripe), and admin dashboard. Optimized user workflows and improved system maintainability for future scalability.
LoreBot AI	Designed and implemented backend architecture using NestJS, PostgreSQL, and TypeORM. Built real-time chat system and push notifications. Integrated Google Gemini API for AI-driven conversations.

Education

03/2020 - 12/2022	Self-directed training in software development (freeCodeCamp, YouTube, Google) Focus: Full-stack software engineering (TypeScript, React, Next, Node.js), building nearly production level projects with the help of open source community
06/2015 - 02/2020	Bachelor of Laws (LLB.), <i>Southeast University, Dhaka</i> , Bangladesh

Languages

German	A2 (actively learning, daily study + regular practice on ChatGPT & free4talk) Goal: Reaching B1 by Q4 2026
English	Fluent / Professional Proficiency

OPEN SOURCE

Package Built	next-api-responder (npm package) https://www.npmjs.com/package/next-api-responder Built a reusable API response handling layer for Next.js applications. Designed to standardize backend responses & improve frontend-backend integration.
---------------	--

Interests

Open Source & Community	Active participation in developer communities and contribution to open-source projects on GitHub to promote knowledge sharing.
Continuous Learning	Strong interest in system architecture and cloud-native technologies; regular participation in tech meetups and conferences.
Culture & Integration	Developing intercultural competence through learning German and working in international teams.
